By the passage of more than three decades many significant changes have taken place in our society, economy, country and the world at large. At this juncture, the education sector needs to gear itself to meet the demands of the people and the country in 21st century. The NEP 2020 proposes the revision and revamping of all aspects of the education to create a new system with the inspirational goals of education, along with holistic approach. It is based on the principle that education must develop the 'Foundational Capacities' of Literacy and Numeracy and 'High-Order Cognitive Capacities', such as critical thinking and problem solving and also Social, Ethical, and Emotional Capacities and Dispositions. The world is undergoing rapid changes in the knowledge landscape. With various dramatic, scientific and technological advancement with multidisciplinary abilities across the sciences, social sciences, and humanities, will be increasingly in greater demand. The growing emergence of epidemics and pandemics will also call for collaborative research in infectious disease management and development of vaccines and the resultant social issues heightens the need for multidisciplinary learning. There will be a growing demand for humanities and art, as India moves towards becoming a developed country as well as among the three largest economies in the world. The gap between the current state of learning outcomes and what is required must be bridged through undertaking major reforms that bring the highest quality, equity, and integrity into the system, from early childhood care and education through higher education.
